FERMOB

IN A FEW DATES

1890 - 1900
Creation of the company from a blacksmith's workshop.

1927
Diversification in the manufacturing of metal furniture.

1953
Specialization in the manufacturing of iron garden furniture.

1974
A change of name, the company was renamed Fermob.

1980
Difficult period for the company due to competition from plastics Fermob's workforce drops from 60 to 15 people.

1989
Acquired by Bernard Reybier. He relied on the expertise of the 10 employees, an international presence, and innovation to develop the company.

2000
1st Fermob shop opened in Paris.

2006
Opening of a showroom in Charnay-lès-Mâcon.

2010
ISO 14001 certification: recognition of over 20 years of Fermob's commitment to sustainable development.

2011
Fermob shop opened in Cologne (Germany): the brand's 3rd shop.

2012
Introduction of the Shop in Shop concept.

2013
- Launch of the decorative outdoor accessories collection.
- New ultra-efficient and zero waste painting line.
- Acquisition of Vlaemynck: with its 25,000 sq. m parasols, furniture and cushion manufacturing, production and assembly plant in Mâcon.
- Launch of the online shop.

HAPPY BIRTHDAY 125ᴬᴺˢ Bistro

2014
- 125th anniversary of the Bistro chair.
- 25th anniversary of the acquisition of Fermob.

2015
Fermob shop opened in Beijing (China) and a second shop opened in Paris.

2016
- Launch of the Balad collection.
- Fermob shops opened in Bangkok (Thailand) and Chengdu (China).

2017
- Fermob shop opened in Haikou and Nanjing (China) and showroom opened in New York.
- Acquisition of shares in Smart & Green.
- Acquisition of Rodet, new manufacturing unit in Anneyron, France.

2018
Fermob shops opened in Lisbon (Portugal), Moscow (Russia) and Port-Louis (Mauritius).

2019
- Launch of the #Fermobpeople community and the 'FermobWeek'.
- Fermob shop opened in Zhengzhou (China).

2020
The Fermob recipe – A happy garden includes: furniture, lighting products, parasols and accessories.

2022
Fermob shop opened in London and contract showroom opened in Cologne.

2023
- Contract Showroom opened in Paris.
- Opening of a store in Vietnam.

2024
- Showroom opened in Mouans-Sartoux.
- Opening of a store in Sydney.

2025
Opening of Maison Fermob in Charnay-lès-Mâcon.

WELCOME

TO FERMOB

A French company that relies on three high-performance industrial sites located near Lyon:

- Thoissey: 14,000 m²
- Macôn: 25,000 m²
- Anneyron: 24,000 m²
- Including more than 450 employees
- Turnover of € 129.5 M in 2024

Know-how:

Metal:

- A splendid and inspiring material
- More than 5,000 tonnes of metal (steel and aluminium) transformed annually
- More than 690,000 parts manufactured annually
- More than 100,000 metal Bistro chairs manufactured in the Thoissey factory each season

Fabric:

- More than 60 years of experience working with professionals
- 40 000 parasols installed every year on the Côte d'Azur
- 50 employees providing a custom-tailored service to enhance your outdoor living
- In 25 years, nearly 1 million parasols have passed through the hands of Vlaemynck's seamstresses
- More than 350,000 m² of fabrics processed each year in Vlaemynck's workshops

THOISSEY (01)

Expertise: the mastery of colour:

- A unique colour palette with a colour chart composed of 25 colours, updated every year to combine, attract and inspire…

Manufacturing with creative added value:

- In-house design studio

A strong reputation in France and abroad, among the general public and professionals:

- Marketing in more than 65 countries
- 50% of turnover from exports

Strong values deeply rooted in the culture of the brand and the company:

- Joie de vivre
- Affordable
- Inspiring
- Detail-oriented

You can use our product daily all over the world:

THE V.I.E AT FERMOB!

VIBRANT. INSPIRING. EXPERIENTIAL.

For over 30 years, Fermob has been designing furniture that goes beyond mere functionality to become the **backdrop for shared moments**, cherished memories, and vibrant lives. From the smallest urban balcony to the largest public spaces, from the charm of boutique hotels to the buzz of café terraces, the French brand infuses its creative energy into every moment of everyday life, driven by the belief that no space is ever static: it is lived in, transformed, and extended — inside and out.

Each year is an opportunity for the brand to broaden its creative horizons, adding V.I.E as one might sprinkle a pinch of salt to elevate a dish with a dash of zest that awakens even the most finest palates. Fermob invites everyone to experience spaces in all their dimensions: **Vibrant, Inspiring, Experiential**.

With furniture, accessories, and lighting, the collections act as starting points for **inspired and flexible layouts that effortlessly bridge indoor and outdoor spaces**. The home flows into the terrace, the terrace blends into the kitchen, the kitchen becomes a stage for grand gatherings, while the living room transforms into an entrance hall — all within the same momentum of freedom and creativity.

Underlying it all is the posture of a **lifestyle brand**, expressed through pieces designed to accompany life itself. Design resonates with its environment, plays with materials, blends colours, and imagines atmospheres both singular and collective. Each product becomes the reflection of a joyful and confident art of living — one to be nurtured and shared without limits.

To this is added a **powerful hallmark of Fermob's art of living: colour**. From fresh pastels to deep shades, from subtle monochromes to bold contrasts, colour breathes energy into every space. Here, colour is not a detail: it is a statement, an emotional link, a promise to share. Colour reveals personalities and inhabits spaces with an intent to make each one unique.

This is how Fermob transforms places into **life experiences**. A balcony, a garden, a living room — all become a **Fermob Home**. A hotel lobby or terrace becomes a Fermob space. A public square, a poolside, an entryway, a meeting room — all are everyday stages where a V.I.E takes root: Vibrant, Inspiring, Experiential. Every Fermob creation, every colour, every ambiance carries within it the unique energy of **Good Vibes Design**. This is the **free-spirited French way of life** that Fermob joyfully spreads — to shine its **vision of beauty, sustainability, and vitality** wherever life takes place!

VLAEMYNCK BECOMES

"EXPERTISE VLAEMYNCK"

RECOGNIZED CRAFTMENSHIP DEDICATED TO PROFESSIONALS, NOW INTEGRATED INTO THE FERMOB UNIVERSE

For over 60 years, Vlaemynck has been a leading French brand in the world of professional outdoor furniture. Known for its specialized expertise, it supports the most prestigious hotels, restaurants, and beach establishments in France and around the world.

Integrated into the Fermob Group since 2013, Vlaemynck has helped broaden our scope of expertise thanks to its mastery of demanding professional outdoor environments and its solution-oriented craftsmanship.

Today, the Vlaemynck brand is evolving and becomes " Expertise Vlaemynck ", fully integrated into the Fermob universe, now the Group's sole commercial brand.

LODGE

The " Expertise Vlaemynck " label identifies our products and solutions designed for professionals and embodies **Vlaemynck's historic know-how**: a broad, high-quality textile offering, certified fabrics, shading solutions, teak and multi-material furniture, custom-made options, and associated services.

This evolution serves a clear purpose: to deliver a seamless, rich, and efficient **professional experience**. It is based on Fermob's key strengths, which already contribute to the success of numerous projects. First, a single brand – Fermob – recognized for its creativity, quality, and durability, now bringing together all of the group's expertise and know-how. Then, **a unified, clear, and coherent offering** designed to meet your global project needs. Finally, **Fermob's commercial, logistical, and international capabilities** support this momentum, helping you realize your ambitions without geographical limits.

Vlaemynck's expertise remains intact – and even stronger – as it is reinforced and fully showcased through the strength, organization, and reputation of the Fermob company.

With the " Expertise Vlaemynck " label comes a reinvented heritage within the Fermob brand, offering you the best of both worlds. Our teams, our service quality, and our high standards remain **your greatest partners in making your projects a success**.

CORTINA

FERMOB

THE COLOUR EXPERT

For over 30 years, **Fermob has made colour its hallmark**. Very early on, Bernard Reybier understood that colour is much more than just a finish. Colour defines a space, reflects personality and emotions, sets a room apart, brings character and **a bold spirit**.

In a market that was initially limited to two colours (white and English green), Fermob galvanised the outdoor furniture industry by offering an **original range of bright, intense and contrasting colours**. Nowadays, the brand is expanding its **colour expertise** with more subtle shades that allow you to **create your own palette** and **play with contrasts and harmonies** to give character to your spaces.
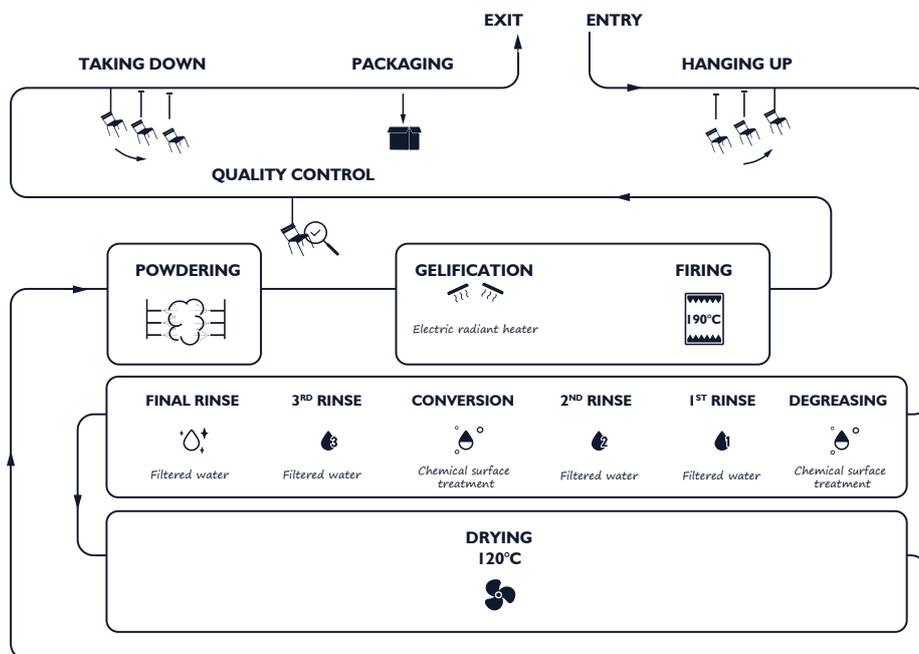

With **25 unique colours**, designed not only to be used on their own, but also to complement and enhance each other, the range offers an infinite number of combinations **to create inspiring and one-of-a-kind interior and exterior spaces**.

And to give its colour chart a boost, the brand regularly develops new shades. This season, Fermob is enriching its colour palette with a **new warm neutral shade**, bringing light to both indoor and outdoor furniture.

Fermob's **colour experts** develop a wide range of shades, whether soft and soothing or bright and vibrant, timeless or daring. Before each launch, intensive tests are carried out to ensure that the colours are suitable for **demanding outdoor use**, guaranteeing:

- long-lasting colour
- scratch resistance
- UV resistance
- moisture resistance

In terms of production, the company has invested heavily in its facilities, and now boasts the **world's most efficient painting line** in its market! A **colour change** takes just **six minutes**, and the 25 shades on the colour chart can be applied over three days, making this **impressive industrial** tool both **flexible and responsive**.

DRYING 120°C

Painting process on the historic Thoissey site

All Fermob metal products are painted with a **100% polyester powder coating**, which has higher UV resistance than the epoxy paints generally found on the market. Paint is applied **electrostatically on the furniture for optimum coverage**, and then the product is baked at a high temperature.

To improve anti-corrosion performance, surface treatments (galvanising, electro-galvanising, electrolytic coating) are added before standard or optional painting.

NEW METAL COLOUR

Its name:

Latte Beige: a subtle encounter

Its family:

The **Timeless** collection, designed to last.

Its world:

Inspired by the **creamy shades** of a milky latte, this refined, **soothing**, and **comforting** hue evokes the velvety texture of a rich foam, the soft matte feel of handcrafted ceramics, or the filtered light dancing across contemporary architecture.

Its superpower:

A chameleon shade that softens bold colours, harmonises without overpowering, and enhances the beauty of contrast. **A luminous hue** that isn't cold, a neutral that's anything but bland — it adapts effortlessly to every style.

Its favourite playground:

Neither too pale nor too intense, Latte Beige **blurs the boundaries between home and garden**.

Discreet yet full of character, this shade enhances furniture combining metal and wood, highlights textures, softens lines, captures light, and **brightens spaces**.

Latte Beige extends the cosy, muted tones of interiors into outdoor spaces — shaking up conventions, always with **elegance**.

Its ideal matches:

Perfect for crafting calm, sophisticated atmospheres, Latte Beige pairs beautifully with earthy tones or greens for a truly natural effect.

Fermob's favourite pairing:

Match it with Black Cherry, Pesto, and Tonka, and add a touch of Marshmallow for a bold and vibrant palette.

THE METAL

WONDERFUL MATERIAL OF IDEAS

For its furniture and lighting, Fermob has chosen metal, Gustave Eiffel's formidable «**material of ideas**». This material is ideal because of its flexibility of use, adapting to **diverse and innovative designs**, but also because of its **sustainability** and **impressive recyclability**.

Steel and **aluminium**, our main raw materials, are **metals that can be recycled ad infinitum**, with no alteration. They boast a **recycling rate of up to 98%**. This remarkable recycling capacity means that our products can be reintroduced into the production cycle almost indefinitely. What's more, these materials are **extremely strong and resistant**, ensuring that our products are able to withstand the weather and wear and tear over time, guaranteeing a long service life.

STEEL

- Fermob's original expertise
- Stable and durable
- Creates an elegant design

ALUMINIUM

- Malleable
- Lightweight
- Easy to weld

Whenever our designers and technicians are working on a new product, **anti-corrosion performance is always top of mind**. We're constantly thinking of ways to eradicate, or at least reduce, areas that could be prone to corrosion because they are not protected or treated.
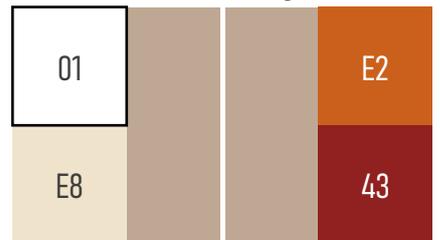

Examples of **corrosion-prone areas** include: rims under table tops, air gaps, tubular parts, areas subject to friction, such as folding mechanisms, areas where the properties of the material have changed as a result of heat (such as from laser cutting or welding).

ANTI-CORROSION PROTECTION RATING

Fermob has introduced a new **Anti-Corrosion Performance Rating (IPAC)** for all metal items of furniture. The rating is an indication of the product's anti-corrosion performance, combining three factors: **design, material and surface treatment.**

Since all our items of furniture are designed for outdoor use, we systematically apply a surface treatment and high-performance outdoor paint to offer the very best protection against corrosion.

On a scale from 1 to 10, all Fermob furniture has a minimum IPAC rating of 6.

All products bearing this logo are eligible for additional, **optional anti-corrosion treatment** (contact our sales department).

The 1st figure gives the basic rating and the **2nd figure in the upper right-hand corner gives the IPAC after additional treatment**. Depending on the products and their design, the IPAC enhancement may be different.

Fermob furniture benefits from anti-corrosion treatment specifically for outdoor use and undergoes intensive tests at our laboratories, in accordance with **general standards on safety** (NF EN 581-1), **stability** (NF EN 1022), and **resistance and durability for collective use** (NF EN 581-2, NF EN 581-3).

TEXTILES

A SPECIFIC KNOW-HOW

For several decades, we have mastered the art of textiles dedicated to **outdoor** use, drawing on specialized expertise at every stage: from the **rigorous selection and development of fabrics** with specialized partners to **manufacturing**, to offer products suitable for demanding outdoor use (dining seats, sunloungers, sofas, parasols…).

Sewing, pattern-making, assembling cushions and parasols, seats and sunbeds: every day, at the production site and the historic Vlaemynck facility in Burgundy, women and men meticulously carry out each step with mastery of their craft. This is our driving force: mastering every stage of production, from manufacturing to finishing and assembly.

Expertise applied across all the group's products.

WHAT MAKES A GOOD OUTDOOR FABRIC ?

- A fabric with technical qualities to **resist outdoor conditions** over time, without degrading (resistance to UV rays, water-repellent & stain-resistant, mold-resistant...).

- A fabric that is **easy to maintain** (removable covers, machine-washable…).

Colour-fast in the sun	Water-repellent treatment	Breathable: quick-drying	Anti-stain treatment	Machine washable

100% ACRYLIC FABRIC

Composition: 100% acrylic

The threads used in this fabric are made from **solution-dyed fibers** during manufacturing. The pigments are added directly into the fiber, giving it excellent durability.

- **Easy to maintain machine** washable at 30°C.

- **Resistance and reliability**, fiber dyed in the mass: **unparalleled resistance to UV rays and weather**.

- **Water-repellent:** prevents the absorption of liquids.

A typology of fabrics, **different collections**:

- **Plain dyed:** ideal for making parasols, sling chairs, cushions (260g/m²).

- **Textures:** very thick fabric (680g/m²), 3-ply yarns and a more refined knit structure.

- **Geometric:** striped look with thick yarn weave (420g/m²).

- **Mix:** woven fabrics with 3 yarn colours (360g/m²).

- **Sunbrella Basketweave:** soft-touch appearance, similar to indoor fabrics while maintaining outdoor resistance (290g/m²).

TECHNICAL OUTDOOR FABRICS

All the **Outdoor Technical Fabric (TOF)** used in Fermob products are **Batyline®** from **Serge Ferrari**, a leading French company in the international market. They are composed of **high-tenacity 100% polyester yarn protected by a PVC sheath dyed in the mass**, which guarantees:

- A **durable and strong** product (withstands a load of 4 T/m²);

- Fabric that does not sag (no fabric pockets forming after use);

- A **modern design** that retains its look over time.

The **4 stages of the manufacturing process** are fully mastered internally by the manufacturer: production of polyester yarn (core yarn), PVC extrusion (sheath), weaving of the fabric, and thermo-fixation.

Batyline® is the **most high-performance technical fabric** on the market and offers numerous benefits for outdoor use:

- **Anti-fungal:** prevents mold growth,

- **Extremely strong:** maintains tension thanks to ultra-regular weaving,

- **UV and weather resistant**,

- **Breathable:** does not retain moisture,

- **Comfortable:** remains soft, always cool even in summer,

- **Easy care:** cleans with soapy water and a sponge.

Batyline® DUO (Cactus)   *Batyline® STEREO (Rosemary)*   *Batyline® ISO (Bondi Blue)*   *Batyline® EDEN (Sage)*
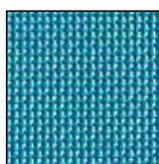

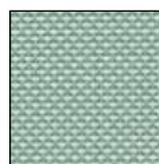

Our 4 Batyline® types offer different weave characteristics and specific properties. The **Stereo fabric** is exclusive to Fermob, while **Eden** offers a soft, textile-like touch.

OTHER TECHNICAL OUTDOOR FABRICS

Specific to certain collections, referred to as TTE or TTE Sling finish. At Vlaemynck, all technical outdoor fabrics meet the following requirements:

- Low deformability

- Lightness and suppleness

- Strength

- Resistance to **UV** and **weather**

Collections concerned: IBIZA (sunlounger fabric only), MARIETA, MILANO, SAN JOSÉ, TEQUILA.

WOVEN POLYMER THREAD

The seats of the **Croisette**, **Sixties**, and **Parisienne 21** collections are handwoven on an aluminium frame. Extruded from polymer resin (plastic), the yarn is then **hand-braided using traditional craftsmanship**. Each piece is unique and requires 8 to 19 hours of manual braiding.
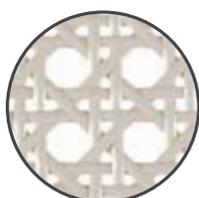

Croisette Collection   Parisienne 21 Collection   Sixties Collection
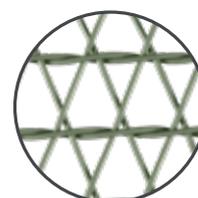

The **Croisette** and **Parisienne 21** collections reinvent traditional weaving with a **textured flat weave**. The **Sixties** collection stands out with its **retro and graphic look**, achieved by **hand-braiding** in a **"scoubidou" style**.

TEAK

EXPERTISE VLAEMYNCK

Fermob draws on Vlaemynck's teak expertise, the **first brand to offer outdoor teak furniture in France**. For over 30 years, Vlaemynck's teak has come from the same facility in Indonesia, a trusted partner that ensures all the teak used in our collections comes from legal plantations, thus preserving the **longevity of this high-quality tropical wood species**.

Teak is a **millennia-old wood**, introduced to Indonesia in 200 AD. Initially used for building homes, it was gradually adopted for bridge and boat construction, and today it is widely used in **outdoor furniture design**.

Teak possesses **exceptional natural properties**. Naturally rot-resistant thanks to the **oleoresin** it produces, it does not rot when exposed to moisture—even in extreme conditions. It is also highly resistant to **insects, fungi, and weathering**.

As the **king of outdoor woods**, teak requires no special maintenance to retain its natural qualities: **strength, durability, and ease of use**.

Appreciated for its comfort and beauty, teak has a **soft, silky feel**, remains **cool in summer**, and its **warm honey tone with copper hues** gradually develops into a refined **silver-grey patina** over time when left untreated.

The teak we use:

- Natural: **untreated and unoiled.**

- Grade C: features natural knots and patterns that give it an elegant, authentic look. Grade C teak may come from trees **under 30 years old** and not necessarily from the tree's heartwood, giving it a **lighter colour and more visible grain**.

- For oiled teak tabletops: a protective oil is applied to the surface to better protect it against liquids and slow the development of the grey patina. **Regular care** is required to preserve its **original honey colour**.

Vlaemynck's oiled teak tabletops are Grade A. The wood comes from the heartwood of trees aged between 30 and 50 years, ensuring a uniform colour with no knots or grain patterns.

Teak reflects **Vlaemynck's expertise**, developed over the years in working with the most prestigious outdoor materials—as well as Fermob's craftsmanship, bringing warmth and comfort to its furniture pieces.

LODGE

AND MANY OTHER MATERIALS

TO COMPLEMENT METAL

DEKTON®

Dekton® is an **ultra-compact material** developed by Cosentino, resulting from an **innovative sintering process** that replicates in just a few hours what nature takes millennia to achieve: the **metamorphosis of stone under extreme pressure and high temperature**.

Used across various applications – **countertops, facades, flooring,** and **external cladding** – it is appreciated for its **versatility** and **technical properties**. At Fermob, we have specifically chosen it for use in **tabletops**, thanks to its recognised **technical performance** and **elegant mineral appearance**. These tops are also **fibre-reinforced** to ensure enhanced **mechanical strength**, perfectly suited to **furniture use**.

Dekton® stands out for its key features:

- **UV resistance:** to ensure long-term **colour stability**, even with prolonged sun exposure.

- **Heat resistance:** Dekton® can withstand **high temperatures** (up to 300°C) without deterioration; **heat does not affect it**.

- **Abrasion resistance:** designed to retain its **appearance over time**, Dekton® resists repeated friction from everyday table use (dishes, placed objects, cleaning…) **without surface wear**.

- **Scratch resistance:** with a **hardness comparable to quartz** (7/10 on the Mohs scale), it can withstand the demands of daily use, ensuring **durability and reliability**.

- **Water and stain resistance:** its **non-porous surface** prevents liquid absorption and makes cleaning easy, **ensuring cleanliness and hygiene**.

Dekton® is naturally suited for both **outdoor and indoor use**, offering a **durable**, **aesthetic**, and **technically advanced solution** for a wide range of environments.

INDOOR MATERIALS

LEATHER

Developed in collaboration with Childéric Sellier, expert saddle-maker and manufacturer of quality leather work, our leather products epitomise **industrial know-how and craftsmanship**. We prefer to use **full-grain leather** to preserve the integrity and nobility of this material. Its distinctive features, such as wrinkles, veins and pores, bestow **unique character upon each item**. Our leathers receive a **semi-aniline finish** that combines a layer of aniline with a layer of pigment to ensure uniform colours without compromising their resistance to dirt.

The leather used for Surprising is a **Spanish ox leather**, selected for its **robustness**; it is designed to last for years. This leather is tanned using plant-based techniques and **solution-dyed**, offering a regular finish and a high quality coloured edge. **Scotchgard** fabric protector is applied to reinforce its resistance to water and protect it against stains and ageing, thus guaranteeing **long life**.

The slats of the Bistro chair are covered with **French calf leather**, known for its **superior quality and durability**. This leather undergoes **mineral tanning** and is **solution-dyed**, ensuring **excellent resistance** and protection against the hazards of everyday life; its natural beauty is thus preserved to ensure long life.

RECYCLED FABRIC

For our **fabric-upholstered Studie products**, we have carefully selected a fabric that offers **comfort and beauty for indoor areas**.

We opted for an **eco-designed fabric**, made from **GRS** (Global Recycled Standard) certified thread, for guaranteed traceability and control over the production line. Comprising **100% recycled materials**, it is made from 60% recycled cotton and 40% recycled polyester. This fabric requires no additional dyes or chemical/synthetic products for its finish, **in compliance with even the strictest ecological standards**. Its **soft feel** and **mottled design**, obtained by braiding different coloured threads, ensure its unique, attractive charm.

OAK

At Fermob, we use oak in three of our collections: **Studie, So'O and Nuage**. The oak that we use is carefully chosen to highlight the **aesthetic and technical qualities of this noble wood**.

For our Studie and Nuage ranges, we use **top quality oak veneer**. The veneer is chosen for its natural beauty, bringing **timeless elegance** and **natural warmth** to our furniture, while guaranteeing **superior durability**.

For the tops of our **So'o oak** tables, we have carefully selected **premium-grade** solid oak, which offers the following characteristics:

- Regular dimensions: it is sawn into planks of the same dimensions;
- Superior quality: it has no major defects, in compliance with the highest quality standards;
- Colour and grain matching: the planks are meticulously selected and put together to ensure visual consistency in terms of colour and grain pattern.

These properties mean that our furniture **will withstand the tests of time**, ensuring particularly long life.

BEECHWOOD

For the Studie stained wooden chair and armchair, we have selected **beechwood** for its **delicate grain pattern** and **natural appearance**.

This wood, with its fine and uniform grain, is enhanced by a **coloured water-based varnish** applied **manually** using a spray gun. This two-coat process — a first tinted layer followed by a clear protective coat — ensures a consistent finish while allowing the **wood's natural variations** to show through. The varnish reveals the **grain effects** and **subtle tonal shifts** unique to each piece, making **every seat one of a kind**.

This **environmentally friendly varnish** is formulated without harmful substances such as **heavy metals**, **formaldehydes**, or **halogenated compounds**, making it suitable for sensitive settings such as **public spaces**, **schools**, **or dining areas**.

The **shades developed for this finish** have been **carefully selected** to blend harmoniously into **indoor environments**. They highlight the material while offering a colour palette aligned with both domestic and professional interior uses.

FENIX®

Innovative material developed by Arpa Industriale, **FENIX®** is a true **revolution in design**. It is mainly composed of layers of paper soaked in thermoset resins, then polymerised to obtain its final structure.

This material offers **excellent resistance to scratches, durability, easy cleaning** and a modern style, making it the perfect choice for tables, kitchen counter tops, desks and other indoor surfaces. These are its main properties:

Low light reflectivity, extremely matt surface

Anti-fingerprints

Soft touch

Thermal healing of superficial micro-scratches

MAKE A LASTING IMPRESSION,

BUT NOT ON THE ENVIRONMENT!

Designed for use in natural settings, all of Fermob's products are made using materials and processes that limit their environmental impact as much as possible. Fermob's design and aesthetic choices have always taken essential environmental priorities into account. From the design stage to the end of the product's life, Fermob is committed to addressing environmental issues. The CSR commitments adopted for over 35 years by Fermob are assets and strong selling points for our customers, as they represent a genuine competitive advantage.

ECO-DESIGN

METAL, A RESPONSIBLE CHOICE

Our two main materials—steel and aluminium—**are 98% recyclable materials**, and benefit from one of the most mature recycling channels in the world.

PAINTS THAT PROTECT THE ENVIRONMENT AND HEALTH

The powder coatings used by Fermob are **solvent free and recyclable**. They are applied in a **zero-waste system**, with a series of baths guaranteeing outdoor use.

Zero discharge of polluted water: measures to balance the successive baths in the surface treatment tunnel.

Zero air emissions: the heat from the furnaces is even recovered to heat the metal treatment baths.

Zero powder discharge: 100% solvent-free polyester powder coating, applied without water, in a closed-circuit operation. The powder that is not bonded to the furniture is vacuumed up and reused.

The fact that Fermob's production facilities are listed as an **Installation Classified for the Protection of the Environment** (ICPE) means that the company has obligations and responsibilities in line with its **commitment to being a responsible manufacturer**. This commitment is also reflected in our participation in a programme for monitoring hazardous substances discharged into water (RSDE).

REDUCING ENVIRONMENTAL IMPACT: AN ONGOING FOCUS

The optimisation and sobriety of energy consumption and water resources are a major concern for Fermob, as has been demonstrated regularly in the form of **practical actions**:

- **Lowering the temperature** used for our heating processes (-10 °C compared to 1998),

- Installation of a **drying system with reduced consumption** (-10%),

- Investment in a **painting line**, which will save eight tonnes of powder per year,

- **Reduction in our water consumption** (-43% between 2015 and 2021),

- **Reduction in our electricity consumption** with the integration of **LED lighting** since 2012.

INTERNAL INDICATORS TO PROMOTE
THE REPAIRABILITY & RECYCLABILITY OF OUR PRODUCTS

To demonstrate its commitment to creating long-lasting products, the Group has developed two additional indexes that are specific to Fermob:

• **The IREP repairability index**

• **The IRCY recyclability index**

These indexes, which have been **part of the design process of our products since 2019**, are intended to highlight our virtuous approach to product lifespan, while preserving our head start in the fields of repairability and recyclability.

The repairability index (IREP) was the first to be formalised after discussions were initiated in 2018. It assesses the repairability performance of our products, which depends on a combination of three factors: **how easily they can be taken apart, availability of spare parts, and the degree of technical expertise required for repairs**.

IREP enables each of our products to be graded on a scale from 0 to 2:

0 IREP	**1** IREP	**2** IREP
Cannot be repaired	Can be repaired by a professional with access to specific tools or expertise	Can be easily repaired by private individuals using simple tools (e.g. screwdriver)

As for **the recyclability index (IRCY)**, it measures the recycling potential of products at the end of their lives. It considers **the types of materials used to make the product, the presence or absence of recycling obstacles** (ease of material separation, electrical or electronic components, etc.), and **the maturity of the recycling processes**.

The classification thus comprises three categories, represented by a specific colour code:

IRCY	**IRCY**	**IRCY**
Non-recyclable	Mostly recyclable	Totally recyclable

In the context of this continuous improvement initiative, these indexes, proactively created by Fermob, are designed to evolve. They will be adapted as the months go by to include increasingly precise score criteria.

MEASURING AND PROMOTING
THE ENVIRONMENTAL IMPACT OF OUR PRODUCTS

Whether it's using the **right amount of raw materials, limiting our production waste, optimising our packaging or developing solutions** to ensure the sustainability of our products, **eco-design** has been part of our DNA for over 30 years.

In addition to developing our in-house IREP and IRCY indexes, we have decided to carry out **Life Cycle Analyses (LCA)** of our products. The LCA relies on a scientific approach:

- **multi-stage**, taking into account every stage in the life of a product
- **multi-criteria**, evaluating between 12 and 16 criteria for impacts on air, water, biodiversity, climate, etc.

This allows us to determine the **environmental impact** of our furniture and lighting. To date, the Fermob Group is **the only French manufacturer** in its sector to carry out this assessment for **all its product references** (excluding accessories).

The goal of this approach is twofold:

- **Improving the environmental performance** of our existing and future products.
- **Highlighting our efforts and expertise** in sustainable design.

For our furniture, the results of each of our LCAs are expressed as a score, a letter associated with a colour, which provides **clear and informative insight** on the environmental impact of our products. As such, **81%** of Fermob products have been awarded an A or B classification (including 52% A), meaning that Fermob **furniture is among the most sustainable on the market**. This is a real source of pride and recognition of the work we have been carrying out for many years. The 'A' classification is awarded to 20% of the best products on the market, all brands included. This proactive approach, which is unique in its scope, has enabled Fermob to anticipate many of the legal requirements for labelling in the furniture sector. Fermob is already sharing this information via fact sheets available on its websites (B2C and B2B).
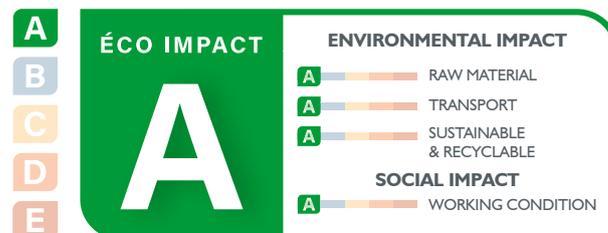

We are working closely with Eco Impact, an independent third-party partner, to guarantee the authenticity and accuracy of this score. This means that we are fully aligned with our commitment to providing **clear and transparent information** to our customers.

Unlike furniture, the life cycle assessments (LCA) of lighting products do not have an impact score ranging from A to E, as the «lighting» category is not included in the reference frameworks. However, you will find an impact graph on climate change to illustrate the product's usage impact, along with a reference to the lighting product's energy label.

EXTENDING SERVICE LIFE THANKS TO SPARE PARTS

In order to **extend the service life of our products** and **promote their durability**, certain components can be replaced in the event of wear or deterioration over time. In our catalogue, we offer a wide range of **spare parts** for **furniture** and **accessories**, including protective pads for chairs and tables, glide pads and cushion covers. We also offer spare parts for **lighting products**, such as diffusers and power supplies.

See our price list for a detailed list of spare parts

Find all our spare parts information by scanning the QR code:

MANAGING END OF LIFE

Fermob has been working with Ecomaison since 2013; this eco-organisation collects and restores used furniture to give it a second life or ensures the recycling of its materials.

Ecomaison's missions are to collect and sort used items of furniture, and to meet the recycling and recovery targets set by public authorities. Fermob commits to this process by:

- Upholding a long-standing tradition of creating **eco-designed** products

- **Informing and raising awareness among its consumers** on the use of eco-participation

- **Promoting donation and reuse** in partnership with players from the non-profit sector

RECYCLED AND RECYCLABLE PACKAGING

For many years, Fermob has been a member of **CITEO, our eco-organisation tasked with collecting and sorting packaging**. As such, Fermob contributes to turning its everyday products into new resources and promotes **'limited packaging'**: packaging that is eco-designed and uses a minimum of raw materials.

RE-PAINT

GIVE NEW LIFE TO YOUR FURNITURE

Since the company was founded, **Fermob has naturally strived to protect its environment and create sustainable products**: solvent-free and water-free paint, recyclable materials for its furniture, zero-waste painting process, heat recycling, workstation ergonomics, etc. Our entire manufacturing process complies with the **highest quality standards**.

FERMOB STRENGTHENS ITS ENVIRONNEMENTAL COMMITMENTS

With repaint, Fermob is strengthening its environnemental commitments by offering its customers a way to extend the lifespan of their products.

Fermob has joined forces with Axalta, its paint supplier and long-standing partner, to offer a brand-new solution to renovate your Fermob furniture, **via a certified network of galvanisation re-paint professionals**. **Available in France for now**.

Exclusive partnership with:

HOW DOES IT WORK?

1. Submit your request online via **https://re-paint.com/renovation-fermob**, selecting your nearest painting renovation professional.

2. Fermob checks the authenticity of the furniture and the feasibility of the renovation. Please note: for technical reasons, certain products are not eligible for paint renovation. This is particularly the case for the Bistro range.

3. The file is then sent to the re-painter, who prepares a quote and contacts the customer to organise the renovation. The shipment and return of the products are the responsibility of the customer.

4. The re-paint professional renovates your furniture.

5. The carefully-finished result will last for years!

KEY FIGURES

- More than 160 eligible Fermob products

- A selection of 15 exclusive Fermob colours

- A network of around thirty professionals spread across France.

CONTRACT DEPARTMENT

DEDICATED TO PROFESSIONAL PROJECTS

We design professional outdoor spaces as true showcases. Hotels, restaurants, offices, public venues... Every project deserves a **global and customized approach**: furniture, lighting, parasols, decorative accessories — everything is carefully considered to create a unique layout.

Historically rooted in the professional market, today we offer over 60 collections and 400 references, complemented by **custom solutions** and **special products**. To support you, the Contract Department brings together **a dedicated team of 50 experts**.

Their mission: to advise you, model your projects (2D/3D plans, BIM files), develop specific solutions, and coordinate manufacturing, delivery, installation, and assembly.

Whether you're an architect, planner, dealer or specifier — in France or abroad — the **Contract Department is your ideal partner for designing long-lasting outdoor spaces open to the public**.
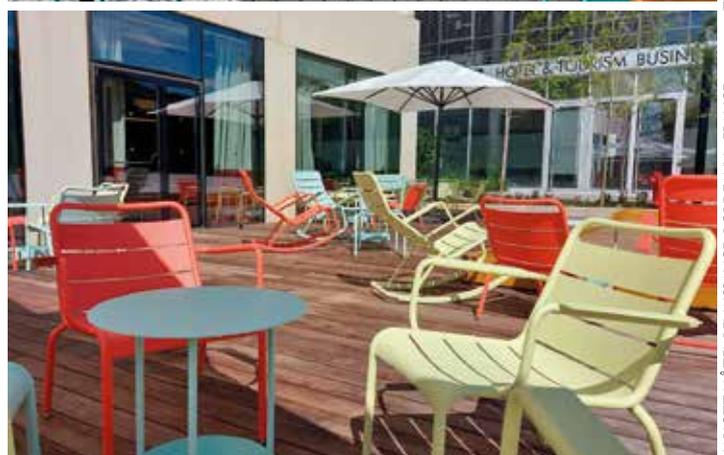

A DEDICATED TEAM TO SUPPORT SPECIFIERS

Architects, landscape designers, interior designers, decorators, project dealers... You play an essential role in the design and selection of furniture for large-scale development projects. Fermob supports you every step of the way thanks to a team of specialists within the Contract Department.

Our experts provide you with:

- **A complete and up-to-date documentation:** metal colour charts, catalogs, technical data sheets,
- **3D files and modeled plans** to simplify your projects (also available on pCon),
- **Decor and space optimization advice** (moodboards, 2D/3D layouts),
- **Turnkey layout proposals:** terraces, balconies, poolsides, rooftops, lobbies, waiting areas, office exteriors...

Whether your projects involve hospitality, restaurants, public spaces, or commercial premises, the Contract team is here to help you design layouts that are both aesthetic and functional.

CONTRACT DEPARTMENT

OUR SERVICES

FERMOB SERVICES – DEDICATED TO PROFESSIONALS

Fermob has built its reputation through close collaboration with professionals.

This privileged relationship has naturally fostered a strong sense of service and quality, deeply embedded in the company's ethos, in order to provide tailored responses and support that meet the specific needs of each client.

ASSISTANCE WITH YOUR PROJECTS

A specialised team of consultants proposing 3D drawings to help you visualise your projects and assist with the layout and design of your outdoor areas.

PERSONALISED ADAPTATION TAILORED TO YOUR REQUIREMENTS

Our Special Projects department is available to propose products to meet specific requirements in terms of your brand identity (charter, logo, etc.), particular functions or custom designs.

INSTALLATION

As well as delivering your order, we can arrange for trained personnel to unpack, assemble and install your furniture and collect packaging from any new products. For a furniture replacement project, we can also collect your old furniture.

LEASING OPTION

Have you considered long-term rental for your outdoor equipment? Fermob proposes easy, optimised payment solutions with 12-60 monthly instalments to finance your outdoor equipment project. As well as developing your project, our teams can assist with financial optimisation, including long-term rental options and three-year replacement offers to preserve the optimal attractiveness of outdoor areas, which are a precious asset to showcase your quality of service...

CÔTE D'AZUR EXCLUSIVE: SEASONAL RENTAL

Our Mouans Sartoux branch proposes specific seasonal business services for professionals on the Côte d'Azur: rental and delivery of equipment, servicing and repairs, weekly cleaning of covers, etc. All these services are available to meet your operational requirements.

BESPOKE PROJECTS – CREATE THE EXCEPTIONAL

Because every project is unique, we have created our Bespoke Projects department to design tailor-made solutions that reflect the identity of your establishment.

Brand identity, technical constraints, functional requirements or creative ambitions — our team supports you every step of the way, attending to every detail, to create bespoke equipment.

EXPRESS YOUR IDENTITY

Turn your furniture into a communication tool:

- **Engraving, laser marking or screen printing** (logo, text, pattern) on metal, fabric or OTF.
- **Embroidery** on parasols, cushions or mattresses.
- **Custom packaging** for corporate gifts or specific requirements.

CREATE YOUR OWN COLOUR PALETTE

Looking for a specific shade? We offer:

- **Special colours** on request (RAL, RAL DESIGN or equivalent),
- Careful colour **coordination** between furniture, parasols and textiles (cushions, seat fabrics, etc.).

ADAPT YOUR FURNITURE TO YOUR NEEDS

Our industrial expertise and network of partners (wood, textiles, etc.) allow us to offer:

- **Custom sizing** or **technical reinforcement** of certain products,
- **Special treatments**, such as fire-retardant finishes on technical fabrics,
- **Fixing solutions** adapted to your requirements: ground fixing, cable systems, and more.

CREATE PRODUCTS THAT REFLECT YOUR IDENTITY

Looking for unique furniture? Thanks to our industrial expertise, we design and manufacture bespoke chairs, benches and tables in metal.

BRING UNIQUE COMFORT AND STYLE TO YOUR SPACES

Customised or tailor-made cushions, parasols and mattresses. We can incorporate your own fabrics, adjust dimensions, finishes or materials to suit your needs.

Bespoke is our expertise. Dare to be unique!

CONTRACT DEPARTMENT

GARDEN OFFICE, PRODUCTIVITY UNDER THE OPEN SKY

Fermob is reinventing **outdoor workspaces** with **Garden Office**, a comprehensive offer designed to make the outdoors a **natural extension of the workplace**. Inspired by changing work habits and the growing need for **well-being at work**, Garden Office introduces a new way to combine **productivity**, **social interaction**, and **fresh air**.

This concept is aimed at businesses, public institutions, and **coworking spaces** who aim to provide their users with **open-air workspaces** that foster **focus**, spark **creativity**, and encourage **collaboration**.

Garden Office means:

- **Innovative product ranges** specifically designed for outdoor work: Adadesk, Bolder

- A variety of **product types:** rocking side desks, modular or round tables, counters, high tables, and stools

- **Fermob classics reimagined** for this specific use: Luxembourg Work

With Garden Office, Fermob brings its expertise in **outdoor furniture** to support new ways of working: more **mobile**, more **flexible**, and effortlessly **open-air**. It's an **innovative vision of the workplace**, where the outdoors becomes a space for **concentration**, **breaks**, or **collaboration**, promoting **efficiency**, **comfort**, and **quality of life at work**.

OUTDOOR FURNITURE
OUR COLLECTIONS

Fermob has been reinventing outdoor furniture with the same passion for more than 30 years, combining innovation with **design and durability**.

The brand's signature is practical furniture, offering exceptional comfort, available in a **range of exclusive colours**, to transform any outdoor area into a **unique experience** for everyone, thanks to its Dining, Lounge and Smart Furniture collections.

For shared moments of fun, relaxation, or work... Fermob designs and decorates outdoor areas elegantly, with products ranging from chairs to planters.

Embodying French lifestyle and that "*je ne sais quoi*" that France is known for, Fermob's collections combine style with practicality to enhance any terrace or garden.

INSPIRED BY DESIGN AND INNOVATION

Fermob furniture is known for its **practicality**, sleek lines, vibrant colours, and elegant designs. Whether it stems from a collaboration with a famous designer or was created by Fermob's Design Studio, every item is designed to associate **comfort and style**.

DURABILITY

The brand uses **long-lasting materials** (such as steel and aluminium) and **paints** known and proven to resist **harsh outdoor conditions**, thus ensuring exceptional durability for each piece.

The **"zero-gravity" position**, as found on the Alizé sunlounger, is **perfect for relaxing** and is widely recommended by medical professionals.

It is this position, with the legs positioned slightly above the heart, that the body adopts in a weightless state. The position was named by NASA in the 1970s. The sensation of gravity is reduced seven-fold, similar to when the body is floating in water.

45° 127° 7°

The legs are raised and the thighs and trunk form an angle of 127 degrees, thereby:
- Significantly easing pressure on the lower back and spine.
- Reducing tension in the lower back muscles.
- Promoting improved blood flow in the legs and reducing strain on the heart.
- Freeing up the rib cage and allowing the lungs to expand, which improves oxygenation.

Zero gravity is reached by raising the feet (7°) and raising the backrest to the maximum (45°).

RIBAMBELLE, LUXEMBOURG, ALTO & MOOON!
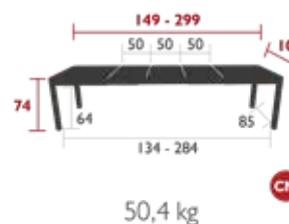

RIVAGE

RIVAGE, is first and foremost:

- 6 modules 85 X 85 cm

- The modules can be combined in an infinite number of ways

- 6 frame colours

- 2 different fabrics (Natté and 100 % Acrylic fabric)

- 13 fabric colours

- Matching piping

6 MODULES 85 X 85 CM FOR AN INFINITE MODULARITY

LOW CHAIR	LOW ARMCHAIR	OTTOMAN	CORNER ARMCHAIR	LOW TABLE	MID-HEIGHT TABLE
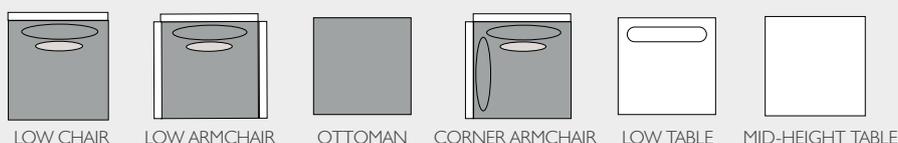

A few composition suggestions with Rivage

LAYOUT N°1   **LAYOUT N°2**   **LAYOUT N°3**
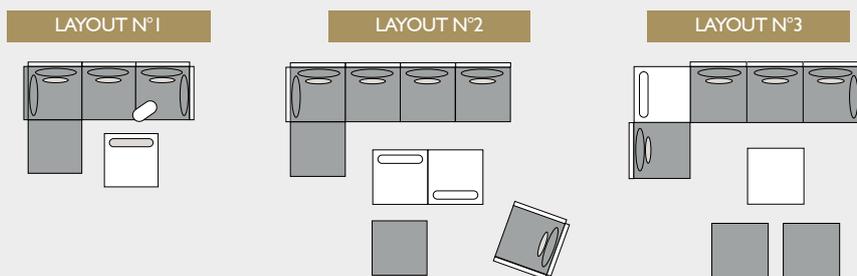

COMFORTABLE CUSHIONS DESIGNED FOR AN OUTDOOR USE
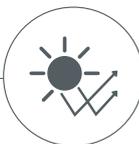

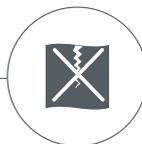

COLOUR-FAST FABRIC	WATER-REPELLENT TREATMENT	BREATHABLE: QUICK-DRYING	ANTI-STAIN AND MOULD TREATMENT	TEARPROOF AND RESISTANT TO ABRASION	REMOVABLE COVERS	MACHINE WASHABLE

⚠ **Cushions must be brought inside during bad weather.**

High resilience polyurethane foam padding:

Chosen for its ability to return to its original shape after deformation, even after long periods of use.
Cushion thickness: 12 cm.

Backrest polyurethane flock foam filling.

The modules are supplied with silencing pads.
Double glides available to connect the modules together and make the layout more stable.

On certain 100% solution-dyed acrylic and Natté fabric references (excluding TX and MX collections), a piped finish is available, with a carefully selected fabric/piping combination.

ACCESSORIES
OUR COLLECTIONS

Fermob applies its know-how, expertise and audacity to the **overall spatial design**. For more than a decade, the brand has been proposing **decorative accessories** to complement its main product lines: outdoor furniture.

Favourite pieces, perfect gift ideas, Fermob's decorative accessories (coat stands, wall hooks, vases, single-stem vases, trivets, bird feeders, mirrors, and cushions) are designed **to enhance both indoor and outdoor spaces**, while withstanding the demands of outdoor use.

THE IMPORTANCE OF DECORATIVE ACCESSORIES

Decorative accessories are essential elements of the **brand's aesthetic, atmosphere and identity**, playing a key role in a personalised customer experience. They bring added value to furniture by providing an additional **emotional dimension**.

Bright cushions, comfy seat cushions, clever catch-all mirrors, colourful trays and trivets… Accessories are the perfect way to add a **unique, personalised touch to any space, creating a warm and welcoming atmosphere**.

OUTDOOR TEXTILES

For its textile accessories, Fermob works with suppliers with proven **outdoor know-how** (Serge Ferrari, Margueroy, Tuvatextil, Vlaemynck, etc.) to guarantee impeccable, high quality products for all kinds of uses.

Cushions, foutas, garden ponchos and placemats are designed in collaboration with experts (stylists, designers, industrial specialists, etc.) selected for their quality standards. Our fabrics are made by French or European partners. Our **Jacquard and printed fabrics and Batyline® OTF** (Outdoor Technical Fabric) are made in France.

The fabrics used for our textile accessories:

- have **technical properties** to ensure lasting resistance to life outdoors without being damaged (UV colour resistance, water-repellent & stain protection treatments, mould resistance, etc.)
- **are easy to clean** (removable covers that can be machine washed at 30°)
- comply with **standards** and are tested for their robustness
  - Colour resistance to the sun and weather
  - Resistance to abrasion and friction
  - Tear resistance

| Colour-fast fabric | Water-repellent treatment | Breathable: quick-drying | Anti-stain treatment | Tearproof and resistant to abrasion | Removable covers | Machine washable |

The **metal accessories** are made in the same factories as our furniture. They are designed according to the same quality standards (steel, anti-UV powder paint).

Like all Fermob products, our accessories integrate the brand's basic standards: **creativity, design and colours**, to ensure **style, originality and practicality**.

FERMOB, LEADING BRAND FOR LIGHTING

DECORATIVE, AUTONOMOUS, INDOOR & OUTDOOR

A STORY FULL OF PROGRESS

1890 - 1900
Creation of the company from a blacksmith's workshop.

A change of name, **the company was renamed Fermob**.
1974

1989
Acquired by Bernard Reybier, Chairman of the Board of Directors, who then relied on the expertise of the 10 employees, with an international presence and some innovation, to expand the company, which today employs more than 300 people.

1st Fermob shop opened in Paris.
2000

BALAD, *H.25 lamp*
Creation and marketing of the **1st portable lamp on the market**.
"Lighting becomes portable."
2015

MOOON!, *H.41 lamp*
2nd collection launched
"The 1st wireless table lamp."
2017

Acquired shares in Smart & Green.

MOOON!, *H.134 lamp*
1st wireless smart lamp.
"Lighting becomes intelligent."
2019

INOUÏ, *H.44 illuminated stool*
1st wireless illuminated furniture.
2020

APLÔ
1st wireless lighting solution.
"A genuine lighting concept."
2021

HOOP, *L.1200 String Lights*
1st sector lamp.
"A genuine suspended lighting solution."

MOOON!, *Wall light, Ø.15*
1st smart wired light.
2022

Baptiste Reybier, son of Bernard Reybier, was appointed as **Managing Director**.

Opening of 1st **Contract Showroom** in **New York**.

MOOON!,
Triple pendant light, Ø15 and pendant light, Ø25
2023
1st smart pendant lights.

SWiiNG, *Lamp H.20*
1st **table lamp** with an integrated toggle switch
2024

OTO, *H.27 lamp*
7th collection launched with a wireless table lamp with 2 light diffusers.

BALAD², *Lamp H.25 & H.38*
BALAD Anniversary:
2025

The start of a **new era** for the portable lamp with the BALAD² collection

INNOVATION FIRST...

CREATION

Apart from quality, **design is a major commitment for Fermob**. With an approach **inspired by changing lifestyles** and history, the products also combine Fermob's **commitments to simplicity, a feeling for detail and, of course, aesthetics**. As well as forming part of our **overall design vision**, the collections are also in step with our observations of **new uses**.

DESIGN

Our development protocol takes everything into account: ergonomics, weight, ease of handling, disassembly, repairability and sturdiness. The result is a product that is built to last & brings genuine delight. Fermob approaches new product developments with a manufacturer's eye, putting together its own know-how and connecting with the best partners for growth.

To support its growth in the lighting market, Fermob set up a **dedicated working group to combine different areas of expertise**. The brand also partnered up with **Smart & Green**, a start-up in Grenoble **specialising in development of portable and smart LED lights** (using Bluetooth 4.0 Smartmesh® technology).

PRODUCTION

Production is entrusted to the **IPW industrial group** created by a joint French and Chinese team, and working closely with Fermob teams. **Specialising in plastic injection and electronics**, IPW develops LED lighting control software and systems.

> **Innovative products that are affordable and accessible in terms of price point and ease of use, with strong environmental credentials (eco-designed, able to be taken apart, and energy efficient, due to use of LEDs)**

FERMOB: A UNIQUE LIGHTING IDENTITY

Fermob lighting builds on the **fundamentals of the brand**: **ease of use, versatility, continuous innovation, a design approach**. Fermob, in tune with contemporary living, offers a **variety of products for a range of lighting scenarios** (with different light temperatures, intensities, etc.) & different accessories for **a unique user experience, just right for every different moment of life**.

Portable or in-place, solar-powered or battery-operated, wired or wireless, Fermob lighting fixtures share a common denominator: simplicity and versatility. Designed to be placed, carried, or fixed, Fermob lights offer **complementary uses**: setting the mood on a table, illuminating a bar area, highlighting a poolside, or marking a pathway.

> **A perfect combo for unique user experiences, just right for every different moment of life.**

MAKE A LASTING IMPRESSION,

BUT NOT ON THE ENVIRONMENT!

Designed for use in natural settings, all of Fermob's products are made using materials and processes that limit their environmental impact as much as possible. Fermob's design and aesthetic choices have always taken essential environmental priorities into account. From the design stage to the end of the product's life, Fermob is committed to addressing environmental issues. The CSR commitments adopted for over 35 years by Fermob are assets and strong selling points for our customers, as they represent a genuine competitive advantage.

ECO-DESIGN

METAL, A RESPONSIBLE CHOICE

Our two main materials — steel and aluminium — **are 98% recyclable materials**, and benefit from one of the most mature recycling channels in the world.

SELECTION OF ECO-RESPONSIBLE MATERIALS AND COMPONENTS

All of our lighting products have to meet several rigorous criteria from design through to production. Fermob guarantees good quality products:

- Selection of **premium quality materials** and **electrical components** (aluminium, polyethylene, LED, glass, etc.),
- Use of materials that are known for their **resistance to OUTDOOR conditions**, procured from suppliers with a good reputation at international level,
- 100% polyester powder coating **with UV resistance,**
- A **dedicated quality team.**

All our lighting is certified:

- The product design work includes performance of several tests in accordance with IEC 60598, testing component strength and uses (e.g. NF EN 60529, etc.)

IEC 60598: The international standard, for all lighting that incorporates electric light sources, which specifies general requirements for operation at power supply voltages up to 1000 V. The requirements and the corresponding tests for this standard are concerned with classification, marking and mechanical and electrical construction.

LED

Recyclable and far **more environmentally-friendly** than all other types of lighting. They offer a long life span, with 85% lower energy consumption **and no toxic mercury content**.

DURABLE AND RECYCLABLE HIGH-PERFORMANCE ELECTRONIC AND ELECTRICAL COMPONENTS

E.g. battery and LED PCB module

(PCB: Printed Circuit Board)

LOW ENVIRONMENTAL IMPACT PAINT

Better for the environment and for **our health**. The powder coatings used by Fermob are **solvent-free**. They are used in a **zero waste system** and are guaranteed for outdoor use.

METAL

A sustainable material. Steel and aluminium are **98% recyclable** materials, and have the benefit of a mature value chain at international level.

POLYETHYLENE OR POLYCARBONATE DIFFUSER

Very strong materials, with the benefit of being **recyclable even after being recycled**.

GLASS DIFFUSER

A material that has the benefit of being **85% recyclable.**

DISASSEMBLING LIGHTING TO IMPROVE LIFE SPAN

ECO DESIGN

Our **eco-design** approach allows us to go further in terms of the **repairability** of our luminaires, enabling us to design products that are easy **to disassemble** right from the outset. As part of this **deliberately chosen approach**, at Fermob we try always to incorporate replaceable parts into all our lamps and lights in order to extend their **lifetime**, and this includes those still under warranty.

80% **of Fermob's lighting products can now be taken apart, repaired and recycled!**

Fermob **considers the Design** by of its lighting products to **make them easier to disassemble** and **to extend their life span**. Several components can be replaced (see detailed list on p.248 and in our Price list)*.

Each package is marked with **repairability symbols** indicating the **type of disassembly** (requiring a professional or able to be completed by user) and specifying the **type of repairability** (light source and/or control unit).

Numerous «product repairability» videos are available on our online sales platforms to simplify and enhance the user experience when they wish to repair their Fermob lighting fixtures.

Let yourself be guided by our short **explanatory** and **educational videos**:

WHERE CAN I DISPOSE OF A USED LIGHT?

When disposing of a **used lighting product**, it is mandatory to **disassemble your light and place it at an authorised collection site**. The instructions and packaging give the user information, by means of regulated markings, to ensure that the materials can be recycled or recovered at the end of their life.

Manufacturers and users have **obligations in terms of management of Waste Electrical and Electronic Equipment (WEEE)**. This symbol indicates that the lighting products must not be put in bins intended for household waste.

WASTE COLLECTION CENTRE

These sites, generally managed by local authorities, take your used products and transfer them to the appropriate processing systems.

RETAIL SHOP

Stores that sell these lighting products are obliged to take back the used products, whether they are small independent traders or large specialist shops.

MANUFACTURER'S PREMISES

Manufacturers take back the used products and transfer them to the appropriate processing systems.

Fermob is **affiliated with ECOSYSTEM** for **processing of waste electrical and electronic equipment** and with **Screlec** for **recycling of batteries**, the latter since the start of the Lighting product collections.

FERMOB'S IP & IK RATINGS AND LUMENS AT A GLANCE

Our lamps and lights are all designed for one or more specific uses right from the design stage, which therefore makes it essential to decide the IP (ingress protection) and IK (impact protection) ratings and desired power output (lumens) early in the process.

As well as the IP rating, certain of the materials used, such as bamboo, are deliberately intended for indoor use only. Bamboo adds elegance to home interiors while at the same time providing lamps and lights with quality and durability.

IP INDEX
Defines the degree of protection provided by the equipment against the penetration of solid matter (first figure) and liquid matter (second figure). The rating ranges from 00 to 68 (according to standard NF EN 60529).

L1200

MUCH MORE THAN A GARLAND...
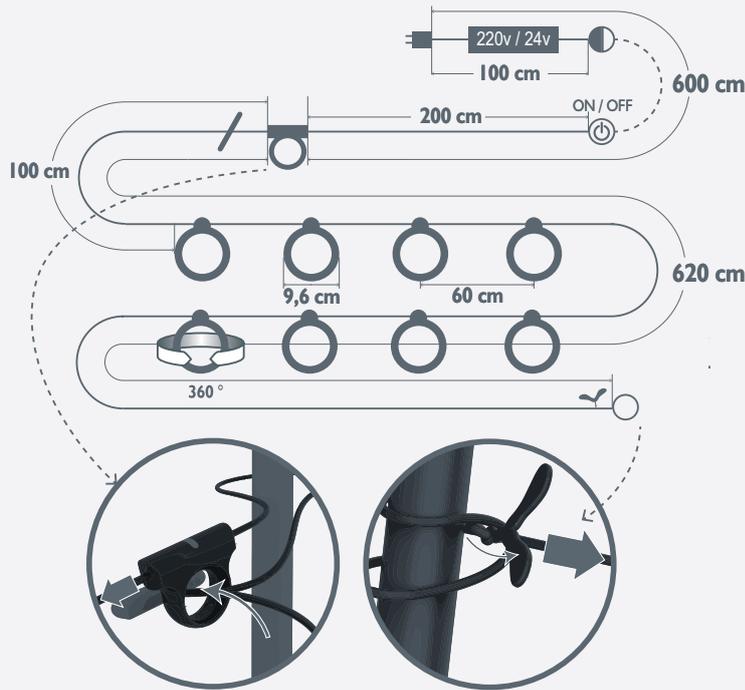

HOOPIK L1200 is a fully fledged **aerial lighting solution**.

It consists of a 12-metre matt black cable, including a 6-metre hanging cable, plus 8 LED spotlights that are adjustable through 360° and 2 hook mechanisms, one at each end.

The dimmer switch, which is easy to access once installed, means it's equally suited to both a muted lounge area and a large, brightly lit table.

What's more, it's equipped with Bluetooth technology and can be controlled remotely with the Fermob Lighting app.

FERMOB ALSO BRINGS WARMTH TO THE HEART OF OUR INTERIORS...

For over 30 years, Fermob has mastered the art of furnishing outdoor spaces with **excellence, creativity, and boldness**.

Today — and for several years now — this joy of living, so dear to Fermob, has crossed the boundaries of the home and **naturally found its way indoors**, extending the experience into every corner of daily life.

Constantly evolving, **the brand explores new materials** — wood, indoor fabrics, FENIX® — and **enhances its collections** with pieces featuring soft lines and welcoming shapes, designed to blend elegantly and effortlessly into **all living spaces**: dining area, office, entryway, living room, hotel room, meeting room... Everything is designed to furnish, accessorize, and illuminate **indoor spaces with style, for beautiful shared moments**.

Fermob offers furniture that is as innovative as it is aesthetic, supporting both individuals and professionals in **creating comfortable, harmonious, and inspiring environments**.

And because Fermob is synonymous with energy and cheerfulness, the brand has selected **a palette of 13 colours** to reveal the full potential of living spaces and to **infuse joy into life's most precious moments**.

Surprising's leather is full-grain and really strong, and it will hold up remarkably well over time. This vegetable-tanned leather, a natural process that respects the environment, is dyed in the mass, giving it a clean reverse side and a tinted edge, a guarantee of superb quality. A Scotchgard finish gives it all its waterproof properties and protects the leather from stains and ageing.

EXPERTISE VLAEMYNCK – FURNITURE

THE COLLECTION

Designed to enhance the most demanding outdoor spaces, the outdoor furniture collections by **Expertise Vlaemynck** combine comfort, elegance, and technical expertise.

EXPERTISE
VLAEMYNCK

Chairs, armchairs, sofas, sun loungers, tables and shade solutions – each piece is created to withstand the harshest weather conditions, including rain, wind, and UV exposure, while enhancing outdoor settings with a style that is both timeless, understated, and unique.

For over 60 years, **Vlaemynck** has supported professionals in the hospitality, restaurant, and beach sectors around the world. Thanks to its recognized craftmanship in textiles and furniture – and now integrated within the Fermob universe – we offer the most prestigious establishments a **comprehensive, customizable, and long-lasting product range**.

LODGE, STELLO, CUSHIONS & KOTO

AN ENHANCED TEXTILE OFFERING, REFLECTING A LEGACY OF EXPERTISE

The textile offering is one of the key pillars of **"Expertise Vlaemynck"**. Rooted in over 60 years of **craftsmanship expertise**, it is distinguished by a **meticulous attention to detail**, refined finishes, and the quality of every component.

Our high standards are evident in every fabric, texture, and shade. The new **fabrics**, carefully selected, combine **elegance**, **durability**, **and ease of use** to meet the practical needs of professionals in hospitality, catering, and demanding outdoor environments.

Natural textures, sophisticated hues, and subtle patterns – these **solution-dyed fabrics fully** reflect our commitment to **sustainability** and **aesthetic excellence**. Their **exceptional resistance to UV rays and weather, long-term performance, and ease of maintenance** are key attributes that have made **"Expertise Vlaemynck"** textiles so successful.

For the 2025–2026 season, this momentum continues with the launch of **10 new fabrics**, developed to offer even more variety, personalization, and creative solutions for your outdoor projects.

SOLUTION-DYED FABRIC

Ecru
Pink

Ecru
Aquamarin

Nautical Stripe

STRIPES

Stripes, one of Vlaemynck's historical signature patterns, elegantly revisited. Available in 260g/m^2 solution-dyed fabric, these new textiles combine timeless refinement with durability, perfect for parasols, cushions, and furniture.

A textile signature that balances tradition and modernity.

Blush Pink

Ecru
Celestial Blue

Riva

Calypso

PLAINS

Amber

Two new 100% solution-dyed acrylic fabrics enrich the Vlaemynck Expertise textile collection: a delicate blush pink and a luminous amber. These **soft**, **warm tones** add richness to the existing colour palette while maintaining the brand's hallmark understated and timeless elegance.

Cactus

Peach

NATTÉ

Two new Natté fabrics from Sunbrella® join the collection.
Their subtle weave and silky touch offer a naturally elegant look while ensuring outdoor performance and durability.

A perfect blend of comfort, refinement, and technical excellence.

LODGE

Discover the elegance of LODGE collection. Each item in this teak collection embodies a **sophisticated**, **timeless style**. Teak, with its natural warmth and robustness, is at the heart of this collection, bringing a sophisticated charm to every lounge and dining area. Some items are also enhanced by aluminium, adding a hint of modernity and lightness to the collection, or by high-quality fabrics offering comfort, softness and customisation.

LODGE is a **comprehensive collection**, ideal for embellishing all areas of an establishment. Every detail has been meticulously thought out to ensure perfect harmony. Immerse yourself in a universe offering a natural balance between comfort and visual appeal as you fall under the spell of this charming collection.

EXPERTISE VLAEMYNCK
FURNITURE

IBIZA & PLAGE
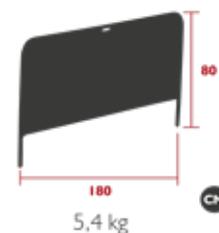

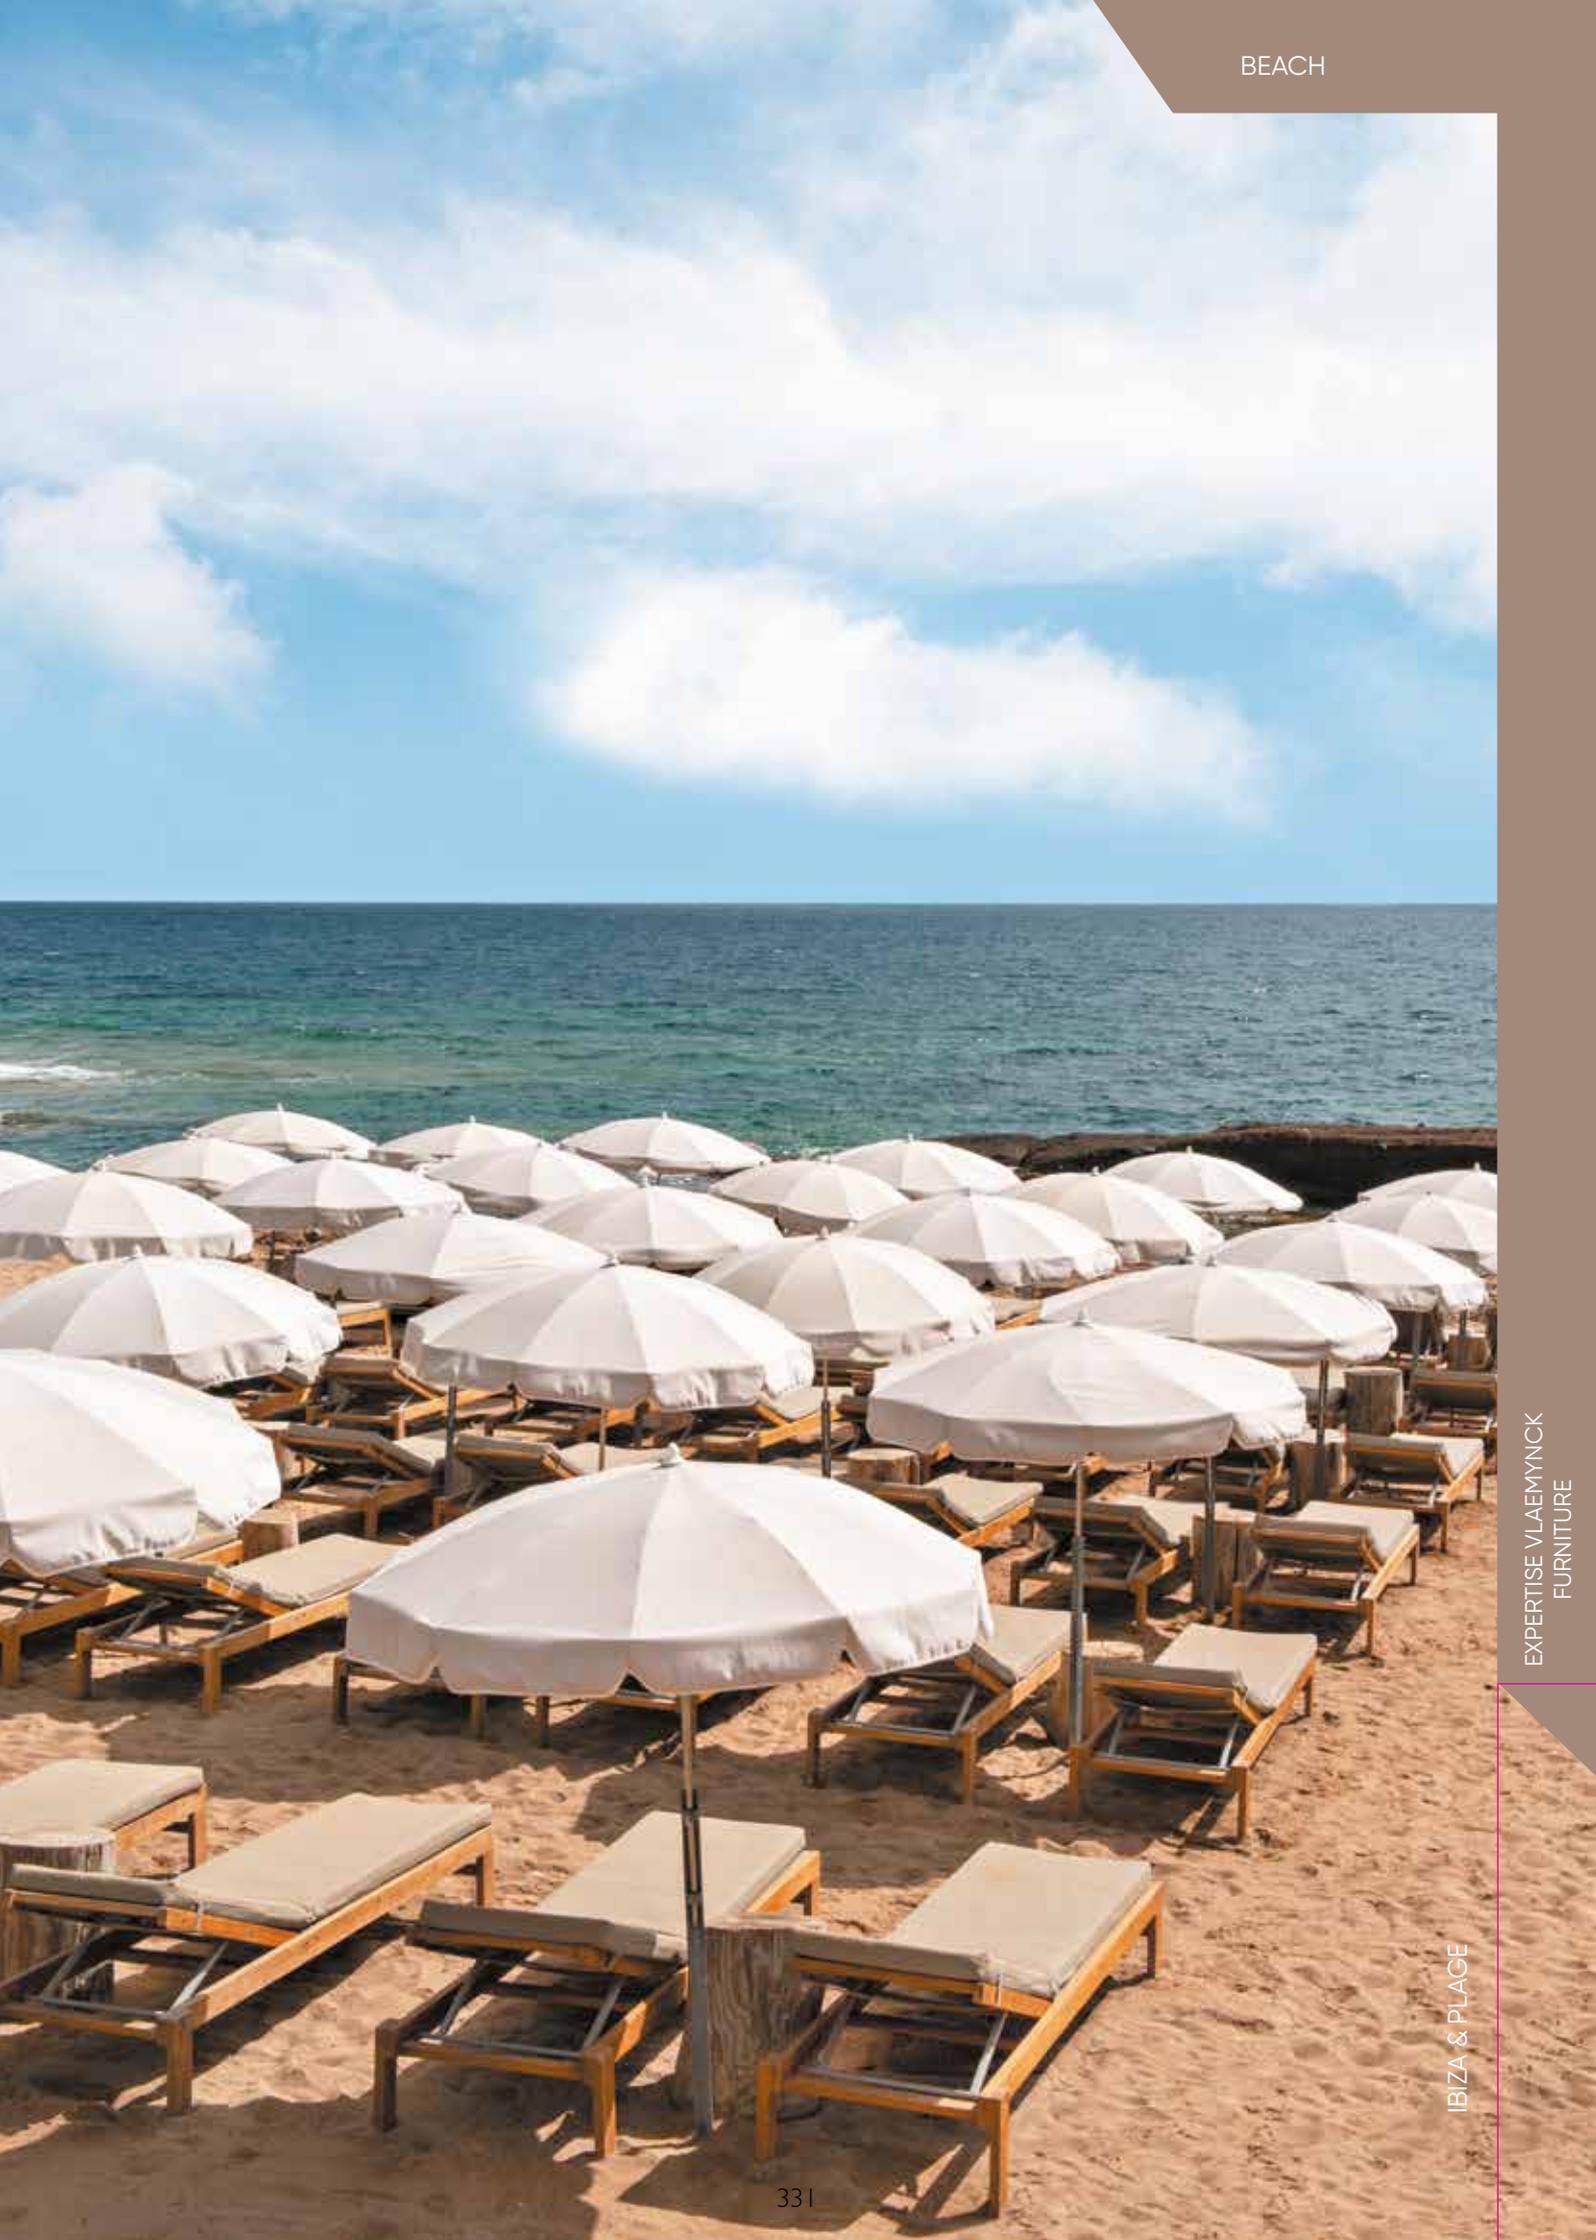

At Vlaemynck, our exquisite finishes are testament to our expertise, **from the material we source down to the tiniest details on our products**.

Although a parasol has a practical purpose, it also has a key role as part of the decor and acts as the centrepiece of a terrace. With its enormous proportions and its incredibly important role, each parasol requires particular attention. That's why most of **our Vlaemynck parasols have a white braid finish**, the brand's iconic signature, and **are delivered with their own storage cover** (excluding the PAXI collection).

ALUMINIUM

PARASOL FINISHES

At Vlaemynck, we believe in excellence in every detail. Thanks to our unrivalled expertise in parasols, we propose elegant and functional solutions to enhance your outdoor areas. See our range of specially designed finishes for all styles and requirements. Let us help you to create the perfect parasol.

1 – FINISH SELECTIONS
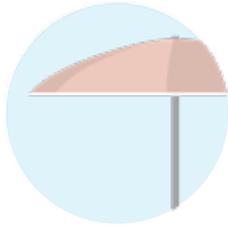

Umbrella and braid
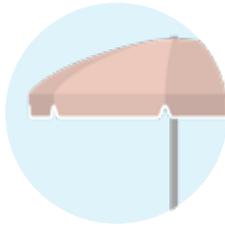

Flap and braid
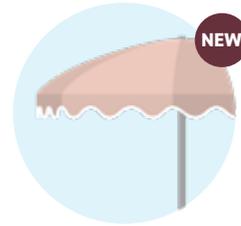

Wave and braid
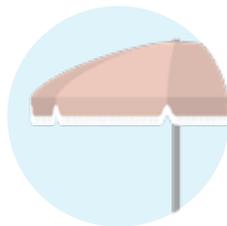

Flap and fringe

GLOSSARY

ABS

Acrylonitrile Butadiene Styrene (ABS) is a relatively rigid, lightweight, impact-resistant and mouldable thermoplastic polymer (a type of styrenic polymer, to be exact).

ABRASION

Wear caused by rubbing.

ACRYLIC

Synthetic fibre that is soft and silky to the touch, does not pill, and is ultra-light.

- extremely resistant to tearing and wear
- rotproof (i.e. prevents the formation of mould)
- keeps its shape
- UV and fade resistant
- does not retain heat or moisture

- resistant to temperature variations (-30° to +70°C)
- resistant to chemicals
- easy to clean: machine-washable at 30°C, no ironing required.

All our acrylic fabrics are water-repellent.

ANTI-UV

Anti-UV treated products are resistant to alteration caused by ultraviolet rays (present in sunlight and moonlight), meaning colours do not fade over time. All Fermob products are UV-resistant.

ANODISED ALUMINIUM

Anodising is a process by which an ultrathin coating is applied to aluminium, giving it a specific colour, hardening its surface (fewer scratches) and stabilising its appearance over time. This treatment is ideal for saline environments.

BATTERY USE CYCLES

The battery's capacity gradually decreases with the use of the light. This is a natural phenomenon. A use cycle includes a complete discharge and recharge of the battery (if the battery is discharged to 50% and then recharged to 100%, this is equivalent to 1/2 cycles). On average, Fermob lights vary between 300 and 500 cycles of use per battery.

BRUSHED ALUMINIUM

Brushed aluminium is an aluminium that has been mechanically treated with metal brushes.

BYPASS

A bypass is a circuit that avoids a device or system.

CAST IRON

Cast iron is a carbon-rich iron alloy. Its density, weight and sturdiness mean that it is ideally suited for stability purposes.

COLD-ROLLED STEEL

The laminated steel is passed through a set of rollers, which transform it into material (e.g. into sheet for table top). Cold rolling is Fermob's technique of choice, since it makes the steel resistant, gives it a precise, uniform thickness, and promotes good paint hold.

COLOUR TEMPERATURE - KELVIN (°K)

Measures the colour temperature of the light. It indicates whether white light is warm (yellow hue) or cool (blue hue). It varies depending on the source. The higher thie figure, the more bluish-white the colour temperature, while light with a lower colour temperature tends towards the red end of the scale.
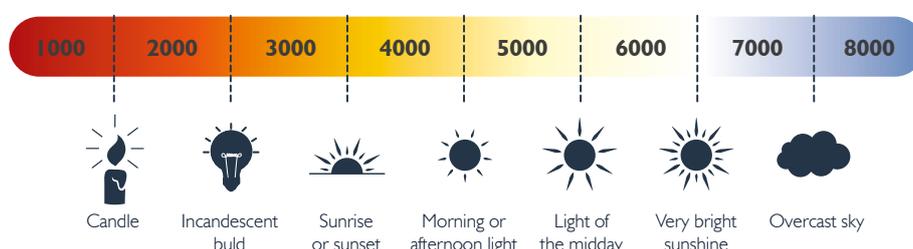

1000	2000	3000	4000	5000	6000	7000	8000

| Candle | Incandescent buld | Sunrise or sunset | Morning or afternoon light | Light of the midday | Very bright sunshine | Overcast sky |

DRALON®

A woven textile made from synthetic fibre that offers excellent resistance to water, stains and UV rays. It is soft in texture, bright in appearance, rot-proof and easy to clean.

ELECTROLYTIC COATING

A surface treatment originally used in the automotive industry. An electrophoresis paint (sub-layer) technique where a part is immersed in a bath of water-soluble paint. Electrolytic coating means that the product benefits from Very High Protection treatment and is suited to intensive use or use in extremely wet/humid environments.

ELECTROGALVANISING

Protecting an object by applying a layer of zinc using electrolysis (electrical energy).

ELECTROSTACIC

An eco-friendly painting technique that involves using powder instead of solvent-based paints. An electrostatic force attracts the powder coating to the metal, achieving optimal coverage. The coating is then baked onto the furniture.

FOAMS

ETHYLENE-VINYL ACETATE (EVA) FOAM
A dense, compact, hard-wearing foam (no cells or air bubbles) that's lightweight and easy to mould.
HIGH-RESILIENCE PU FOAM
A polyurethane foam selected by Fermob for its ability to return to its original shape after deformation, even following an extended period of use.
OPEN-CELL FOAM
A foam that allows liquid to pass through. It does not retain water and dries very quickly, meaning that the cushion does not stay wet.
POLYESTER FOAM
A PU-type foam with open cells and variable density. This versatile foam is typically used to make padding and occasional seats.
POLYETHYLENE FOAM (closed-cell)
A foam used for thermal insulation and for air-, water- and dust-proofing.
POLYURETHANE (PU) FOAM
A high-quality foam known for its firmness and comfort. It consists of fine closed cells enclosing a low thermal conductivity gas. It makes an excellent thermal insulator.
RETICULATED FOAM
A foam with very fine, regular closed cells. This is a rot-proof and waterproof foam.

GALVANISATION

Iron protection process that involves dipping a part into a bath of melted zinc.

GALVANISED STEEL

Galvanised steel is crude steel with anti-corrosion treatment (a layer of zinc is applied to prevent is from rusting). Before painting, it has an untreated, matt grey appearance.

HPL TABLE TOP

High-pressure laminate (HPL) is a composite material made up of several layers of kraft paper and a thermosetting resinimpregnated decorative paper

HYDROFORMING

A manufacturing process used for Cadiz's armrests, in which a material is shaped by injecting a high-pressure fluid
and working with the material. This process was previously mainly used in high-tech industries such as aerospace.

IK INDEX

Defines the strength of a device against knocks and impacts, but not against falls. The test is carried out with a steel vertical or pendulum hammer. The rating ranges from 0 to 10 (according to standard NF 62262).

IP INDEX

Defines the degree of protection provided by the equipment against the penetration of solid matter (first figure) and liquid matter (second figure). The rating ranges from 00 to 68 (according to standard NF EN 60529).

JACQUARD FABRIC

On a Jacquard fabric, the patterns are made by criss-crossing threads. The Jacquard loom, developed in 1801 by Joseph Marie Jacquard from Lyon, is capable of creating weaves with complex patterns.

LACQUERED ALUMINIUM

Lacquered aluminium is an untreated aluminium that has been painted.

LED - LIGHT EMITTING DIODE

An electronic and optical component that transforms the electric current passing through it into light. It has many advantages:
- economic
- ecological
- instant lighting
- long service life (25.000 to 100.000 hours)
- no critical materials (e.g. no mercury)

LOUNGE OTF

Outdoor Technical Fabric (OTF) is a Batyline® fabric manufactured in France by the world's leading firm, Serge Ferrari. This high-tenacity 100% polyester thread is protected with a solution-dyed PVC cover for exceptional colour-fastness. OTF keeps its shape, is light, flexible and sturdy, and does not deteriorate over time. It is resistant to both moisture and micro-organisms, and is treated with an anti-fungal product. The tight weave, coupled with the performance characteristics of Batyline®, give this material a textile-like feel and make it ideally suited for outdoor use. Lounge OTF is a unique material which combines the elegance of a natural-looking textile with the performance characteristics of a technical fabric.

LUMINOUS FLUX - LUMEN (Lm)

In photometry, luminous flux is a measure of the power of a light source as perceived by the human eye. It's the most commonly used indicator of the total amount of light emitted by a light source in all directions.

PHOTOVOLTAIC PANEL

A photovoltaic solar panel is a device that converts sunlight into electricity using special cells known as «photovoltaic cells.» How does it work? The solar panel consists of photovoltaic cells, typically made of silicon, a semiconductor material. When sunlight hits these cells, it causes electrons to move, thereby generating a direct electric current. An inverter then converts this direct current into alternating current, which can be stored in batteries. The advantages of a solar-powered lamp post are numerous: $
- Utilizes a renewable, free, and infinite energy source (the sun)
- 100% self-sufficient and produces sustainable energy

PIPING

A narrow cloth strip between two pieces of fabric, slightly protruding at the seam.

POLYETHYLENE

Polyethylene is one of the most common thermoplastic resins in use today. It is known for its excellent impact resistance.

POLYPROPYLENE

Polypropylene, also known as PP, is a semi-crystalline resin, a synthetic fibre from the family of thermoplastic polymers. It has a number of excellent properties that are of great benefit in outdoor textiles, including high water resistance (water repellent) and good UV resistance. It is made from non-toxic, non-allergenic substances (Oeko-Tex class 1) and is recyclable.

ROTPROOF

Guarantees against the formation of mould over time. This is an important guarantee for outdoor products.

SILENCING PADS

An exclusive, patented technology that allows furniture to slide effortlessly across the floor and features an integrated shock absorber to reduce vibrations. Comes as standard onLuxembourg & Salsa.

NOISE REDUCTION OF 14 DB = 10 TIMES QUIETER!

STAINLESS STEEL

Stainless steel is a steel and chromium alloy that is highly resistant to rust and corrosion.

SOLUTION-DYED

Fermob uses solution-dyed textiles (the dye is applied to the fibre, not the surface). This dyeing technique means that the colour lasts five times longer than a conventional dye.

TEXTROL®

Natural plant oil-based wood saturator that helps wood retain its natural appearance for a long time. Does not form a film or chip off, does not peel away over time, does not darken under the effect of UV rays.Fermob uses this product on its Bistro Natural chairs.

WATER-REPELLENT

A water-repellent fabric does not instantly absorb water droplets. Instead, water slides off the surface. It reinforces the resistance to stains and mould. However, if the water is not removed quickly, it will end up being absorbed into the fibre (water-repellent is not the same as waterproof).

YARN-DYED ACRYLIC

A yarn-dyed synthetic fibre is dyed on the yarn after it has been manufactured.

THE FERMOB GUARANTEE

CHARTER

EUROPEAN FURNITURE GUARANTEE

When we design our products, we pay special attention to three key aspects:
- making sure the piece will continue to fulfil its intended purpose for many years to come
- anticipating how it will age as time passes
- designing it so it is suited to our customers' requirements

As a manufacturer, we have a duty to guarantee that our products are fit for purpose, no matter how our customers use them.

Each Fermob brand furniture products comes with a recommended usage setting, so you can better cater to your own customers' requirements and keep
the guarantee valid:

1. *Domestic:* *product designed for private use in non-public spaces such as gardens, winter gardens, patios, terraces and balconies.*

2. *Professional:* *product designed for professional use in supervised public spaces such as restaurants, outdoor pools, beaches and recreational facilities.*

3. *Intensive professional:* *mobile product, not fixed to the ground, designed for professional use in unsupervised public spaces such as motorway service stations, public parks and squares that are accessible around the clock.*

DOMESTIC	PROFESSIONAL	INTENSIVE
DOMESTIC	PROFESSIONAL	INTENSIVE
DOMESTIC	PROFESSIONAL	INTENSIVE

Please note: products marked "Indoor" are suitable for indoor use only. Failure to comply with this instruction from the manufacturer will invalidate the product guarantees.

The Fermob guarantee has changed.
Scan the QR code to see the new version.

PROTECTION & MAINTENANCE

FOR YOUR PRODUCTS

Fermob makes every effort to ensure that all its products are easy to maintain, thereby prolonging their lifespan.

See our tips for:

- Maintenance and cleaning
- Protecting your products from the elements
- Extending their lifespan (spray paint, rust inhibitors, spare parts, instructional videos)

Scan the QR codes to find information on protecting and caring for your Fermob products.

WINTERING & MAINTENANCE
